Abstract:

Along with population growth and development The rapid town, the development of infrastructure necessary and urban infrastructure to improve the quality of life communities and supporting various community activities and the government is in it. One aspect of construction-related fields such business is Contracting (contracting services), particularly in parts Mechanical Electrical and Elevator Escalator, where PT. Victorious Kencana has diligently handled since 1965. Now, PT. Jaya Kencana has been recognized as one of the contractors Indonesia's leading because the reliability and accuracy the basis of service time to customers. PT. JAYA KENCANA manage so many projects in Indonesia especially in Jakarta on a large scale or small, this illustrates that. JAYA KENCANA requires a system to prioritize the ease and speed of operation is the course of an administrative order to support technical work.

APPLICATION OF FINANCIAL MANAGEMENT PROJECT PT. JAYA USING VISUAL BASIC 2008 KENCANA AND MS. ACCESS is expected to become an application that can accommodate and access all the data needs finance the entire project, can facilitate practical financial monitoring of project budgets, where it can be a reference project manager in decision making cash disbursements.
