Keywords: Interactive Sites, PHPNuke, Content Management System (CMS)

Abstract:
The writing is clear on how to build an interactive website where site visitors can participate in the activities and development of the site's content. This site is a comprehensive site where all the lawyer-categories of sites can be carried out for various things in accordance with the desired criteria. Therefore, the authors propose an alternative to building an interactive site-based Content Management System using PHPNuke.
