Abstract:

Information is a means to convey a message that we can receive both spoken and written, and various kinds such as magazines, television, radio and computers. We have the information media is very popular is the Internet. By using the Internet we can get information quickly, precise, accurate and practical.

A mother's pregnancy is a miracle, because it only takes 9 months of the establishment of a new living creature. Starting from the union of sperm cells and egg cells fetal life's journey begins in the womb the mother or fetal development from week to week. Microsoft Front Page 2003 is a new web design program from Microsoft. Use the program Frontpage menu is to create a simple website display. This application contains only about the growth of the fetus in the mother's womb from week to week.
