Abstract:

The diner is one type of business that was founded by individuals or also by some people. The diner was founded with the purpose and objective for profit or also for business. Restaurants providing food / food everyday. Seeing the development of many restaurants that have a poor performance, these factors may allow loss of list price, and also a list included in the price list yet accurate. Given these problems result in errors in determining the price of goods, calculation of the amount of payment and also a delay in the service to consumers. With these background issues, it is appropriate to use computer tools in the administration of sales, thus once the payment system to manual will be replaced or treated computerized.
