Abstract:
This explains the scientific writing about the design of the Intranet programs in drug sales information by using a programming language FoxPro 2.6 and assistance programs that ACCPAC PLUS program package. In this scientific writing, to know the sales results from both the Daily sales per Pharmacies and per product is still a lot of manual rendering them ineffective and inefficient, therefore, to overcome this author tries to provide information daily sales data by utilizing computerized Intranet facilities. At the end sales of the drug application programs using the Intranet facility as this information will be applied to the PT. Gala Djaja Kingdom to facilitate in providing information and creating reports.
