Keyword : systems, processing of academic values

Abstract :

Today's progress has touched all aspects of life, including aspects of education. In the world of education today is not unreasonable if untouched by the computerized system. Nearly all school levels including secondary school, the students have been introduced with an instrument called a computer. Unfortunately however, the processing system or rapport final grades in each secondary school is still done manually. In addition to reduced effectiveness of the time, teachers who also doubles as mayor Class sued by a mechanism has been established by the Department of Education to provide value as well as process into the final value and put it into report cards. That is why the writing of this KKP authors hope to provide a snapshot of the final value of computerized processing and helps facilitate processing rapport final value or values.
