Abstract:
Part marketing, particularly the sales division is a very important part for the decline of a company forward. Because of where the goods or services a company will be marketed or sold to generate income for the companies themselves. By analyzing the existing sales process and then sets out into the new system, with the goal of keeping the sales process is expected to be increased. Explanation can be seen from the Data Flow Diagram of Diagram Context and Zero, Entity Relationship Diagrams and Normalization, as well as components such as customer data management, goods and transactions. By limiting the problems in the manufacture Formats orders, invoices or receipts and sales reports sederhanan hence made a program that uses Microsoft Visual Basic or for processing the above data.
