Keywords: Sales Administration System for Electrical Equipment

**Abstract:**

This final project proposed administrative system turnover at PT. Use the Light Electric. Sales administration system in PT. Electric Light in its activities in order to not use a computerized system, but still use the book as a means of recording. This resulted in activities that do not require a short time and reduce the effectiveness of performance. Therefore, in overcoming the existing problems as well as an input in improving the administrative system of the existing sales, the writer feels the need for a change in the administration system, namely by using the computer so that data can be processed with good, fast, and accurate.
