Keyword : Tourism Image Applications, Microsoft Visual Basic 6.0

Abstract:

One who makes an interesting tourist attraction is about what's special about attractions. And the information is sometimes very difficult to obtain. So with this application is expected to get a picture of these attractions, though have never visited. In this application, the author tries to provide information which supports about these attractions. This application presents six fruit attractions on the island of Java, each object is given a picture tour with caption.
