Keyword : East Belitung District

Abstract:
The Internet is a medium that is widely used by communities to receive and distribute information. This increase was marked by numerous web sites that appear as a medium of communication and education that is able to accommodate and serve the various forms of information, and interests. The new East Belitung province was inaugurated on May 25, 2003 was felt necessary to introduce regions to the general public using the Internet media that is by making the web simple and attractive and provides convenience to users who use the services of such web sites.
