Abstract:
Writing is about the problems that arise in the administration of delivery of goods or package at a shipping company. The author proposes an application for administrative delivery of goods in an effort to solve administrative problems in delivery of the goods. This application is used to improve the effectiveness and quality of work of the administration of such shipments.
In these applications store data consignor, the goods data, destination address and length of delivery and delivery report monthly. The final part of the writing of programs is attached as supporting the application.
