Abstract:

Progress in the field of computers at this time the community has been very rapid. Benefits of computerization not only enjoyed by large companies but also by small companies and even individuals. One progress computer is a database processing system.

Computerized data processing company is very helpful in treating parcel data, especially data that is quite large. Computerization is part of the activities of a large parcel companies benefit in the advancement of the company. Computerization will also show the performance of the company to the customer so they will create the impression keprofesionalisme company by customers.

Performance of the company depends on the data and information quickly and accurately. Search and exchange information in the parcel company becomes faster and will certainly reduce the waste of time in the company. The report will be faster up to the boss so it is easy monitoring of the company.
