Keywords: Supply System

### **Abstract:**

It describes the scientific writing about analyzing the price bidding system renovation at. Reality XYZ, which is still partly use the manual system, and also the constraints that are running, for that is analyzing these systems in order to replace manual systems with computerized systems. With the computerized system the company will find its ease of processing and benefits as in overcoming delays in the presentation of a report using database applications such as dBASE V. With the replacement of the new system aims to improve the flow of data and information works in Housing Renovation Bid System and to determine ways of better operations, for acceptable fast, precise, and accurate.
