Abstract:
School is a place to seek knowledge, of which has not been understood to understand. School MI Islamiyah tarbiyah first school was built at this school Pondok Aren require computer equipment and programs, to access the data value of students perbidang study, so teachers do not need to record the value of students booked because of where the book value recorded data like missing. So with that we are the authors provide students the value of the data program using Visual Basic 6.0 application program which the program is not too difficult to handle in a record where the value of direct student unprocessed. Visual Basic program was helpful in dealing with everything that is in good schools for the Guardian class that handles about rapot students and data for the Tata business that handles financial management.
