Keywords: Rental System

Abstract:

CV. Andaya Puri is an enterprise that is engaged in equipment leasing party. But there are still deficiencies in the management of the provision of information on the number and types of equipment.

The purpose of writing this research is to present the numbers and types of equipment will be rented to customers and the relevant sections.

Based on the constraints faced by authors propose a change from the old system was in process list of party rental equipment, checking and producing computerized reports using Access Microsoft applications.

Hopefully, with computer tools can help to work in accordance with company expectations.
