Abstract:
This study contains a simple application program on the computerized sales at Bina Insan Foundation Honor. The system works is by using the input data items that are available and the sales process, which will then automatically stored in a database and display the output results will come out that will be received by the buyer as invoices and view reports required by the foundation. The process of inputting and sales of computerized this makes data processing more efficient and accurate and can provide information on existing inventory.   The need for information is very important, especially in the business world. The author hopes to were made about Applications Sales at Bina Insan Foundation Honor the information about the sale can be done better.
