Abstract:

Development of a rapid computerized cause the computer is not a new item for the middle to upper levels of society. Today computers have become much-needed items to complete their jobs or accomplish all their tasks.

As human beings we would never escape from errors or deficiencies, that we often neglect our obligations to the Almighty to fulfill all of His commands, such as prayer or praying five times fardhu the ruling must be implemented. Therefore, prayer reminder for this application is expected to be beneficial for the people who always use computers in completing their tasks, in order to always be reminded to carry out the obligation to always pray on time.
