Keyword : Digital brochures, Café, PHP and MySQL, Macromedia Flash 8

Abstract :

Making digital brochures café applications using Macromedia Flash 8 which became the subject of Scientific Writing is using mobile media to run the application. By using simple tools, action scripts and PHP files are used to connect to the server from the café, making this application to have any credibility in terms of business promotion and marketing. Made application allows users to be able to book a place or a reservation to use the online reservation form, and also be able to order food or beverages supplied through a delivery order form.

Scientific Writing describes the process of making applications ranging from component design stage, making the scripts, preparation and publication of a flash file server with a facility that has been provided in the software Flash 8.
