### **Abstract:**

Post-crisis (1997) until today, Indonesia is in the intensive supervision of the World Bank and IMF. However, following the IMF's policy seems not so profitable for Indonesia. At the end of 1997, began a change that in one term is called, times had changed. Currently humans live in a new era with new symptoms. That is, the power of capital and all its derivatives (derivatives) on the order of living together (shared life).

In this era of helter-skelter, a new political-economic order, born of the liberal economic revolution, emerged. His heart is the privilege of obtaining capital from a variety of territorial and national order of the rules. These symptoms gave birth to a new monster on a global scale, namely the strength of international business.

Amid the business competition, especially in Indonesia, apparently share of motor vehicle sales are still very promising, as evidenced in Jakarta alone would sell 100 units of motorcycles per day. Therefore, in line with the increasing number of vehicles using it more and more also request the motor as the spare parts of motorcycle maintenance. Sale of motor spare parts business is quite profitable including one of which is the sale of motor spare parts is very well known in the area of Tangerang Cileduk which business is developing very rapidly.
