Keyword : design, website

Abstract :
Laboratory is a tool to practice the theory acquired in class and outside class. With good teaching and training at the lab will prove that the theory was right or wrong is obtained, and results can be developed by praktikan practicum. To be able to implement good teaching, appropriate teaching materials such as experimental module and practical questions are organized. By designing and creating a website and put them into a server, so it can be accessed by the praktikan with faster and easier learning process on lab work. Therefore, using PHP scripts in designing and making the information dynamic web-based practicum, and MySQL as database server, data maintenance is expected to become easier.
