Abstract:

Internet is now become a choice of the most effective in disseminating information, because the Internet has a network coverage wide. One of the great information that gets a place on the Internet, among others, information relating to education. This information is conveyed through one of the storage media is information on the Internet Website.

Scientific writing is trying to explain how making a website about cultural recognition of the archipelago, especially clothing and custom house for elementary school students. Starting from design stage design, making websites ready to publish on the Internet. All were created using Macromedia Dreamweaver 8.
