Keyword : Application of Population, Visual FoxPro 9.0

Abstract :

Scientific writing is about a population in the Scope of Application Program Neighborhood / RT. Because in this sphere should be applied computerization should have started well in terms of managing the administration of residents such as creating a Letter of Introduction to ID cards, Family Card, Letter Swap, or other data related to population problems in the future so that there is no longer the process of recording. Repeated data as well as a waste of time and cost is not small.

Residential Program Application is using Microsoft Visual FoxPro 9.0 for using Microsoft Visual FoxPro 9.0 Population data management application is designed to be easy by utilizing the various facilities provided by Microsoft Visual FoxPro 9.0, so it is easy to use application.
