Keywords: Applications, Minimarket, Visual Basic

### **Abstract:**

Market is the place of sale and purchase transactions, in transactions conducted in cash a lot of things that need to be considered by the seller and buyer, in order to reach an agreement and the benefits for both parties. One type of modern markets there is a mini business. In order to mini business can run well and transactions become more effective, efficient and profitable. We need a sales application that can help solve those problems.

Therefore, the author makes the writing of the title Minimarket Applications With Visual Basic 6.0, which was created by using Microsoft Visual Basic 6.0 and Microsoft Access for the database.
