### **Abstract:**

Microsoft Visual FoxPro 9.0 is a software used for data processing. Data processing done with the database as a place to store data.

Like PT Payroll in general. XYZ also has a lot of employees so that employees on the payroll processing reports each month. To control the salaries of employees and facilitate in making the report used language Microsoft Visual FoxPro 9.0.

With this application, it is expected to be useful in improving the performance of employees. This is because the performance of the employees can not be separated from data and information quickly and accurately so that the time it takes to be a little more.
