VISUAL BASIC APPLICATION DATA MANAGEMENT SERVICES FOR PATIENTS IN CLINIC REGISTRATION AL FALAH

Ahmad Rojafi, 30403193, Diyah Ruri Irawati, SKom, MMSI

Abstract:

This application program is designed to simplify the administration of the clinic of Al-Falah, because by using this application program activities and long term enrollment of new patients will be rapidly carried out. Especially for older patients who forgot to bring the card to treatment, patients can be served faster because of the program to search for patient data is easily and quickly, the data can be easy on looking good with numbers and patient medical records with patient names. Printing reports record medic available if necessary by a physician, physician data report, and report patient data per day.
