Keywords: Macromedia Flash, Web Design

Abstract:

Today was a lot of software that is used for the manufacture of a biased website but for the ordinary use of the software that a user must have expertise in a particular programming language. But the other is with flash, this software allows one to make the homepage without the need for HTML proficiency or collect books. In addition to the flash users can create good visual effects, and can produce a highly interactive website.

The concept of the site is expected to help internet users to make it easier to get the latest news and information. And also the media to the site owner to deliver the news and information related to the group band Linkin Park to its loyal fans in Indonesia.
