Keywords: phone subscriber registration, PT TELKOM

**Abstract:**

To be able to provide services in telecommunications, PT TELKOM established Telecommunications Service Center, better known by PUSYANTEL. In its service to the community there are the constraints faced by the registration system to process payments. For that reason, this application program is made for the convenience of prospective customers about the procedures for registration of new pairs of telephone and telecommunications services provided Services (YANTEL) PT TELKOM can be tailored to the needs and demand prospects.
