Abstract:
At this writing, the authors take the title "Pendafdtaran Administration System and the Student Course Fee Monthly Dance Studio in Studio ESPE using Microsoft Visual Basic 6.0 Applications". Sanggar has now stepped forward, we need a good management in managing these centers.

In a dance studio, searching and data processing have many different ways. It can be seen from the system of registration and monthly fees they run, whether the system is still using manual or computer means terisasi. But at this point the studio is masihg using manual method, whereas today the technology is getting advanced.

For that would be nice if the system enrollment and monthly dues that are still using a manual developed through a computerized system. Because the registration system and computerized monthly dues will be effective and efficient in searching and data processing, so that the data did not overlap with other data and in preparing the information needed does not require a long time.
