Keywords: Funding Submission

Abstract:
Use of computer equipment in the field of administration in finance / credit helps smooth running of the system that existed at the AL-JIBAAL BMT and can support efficiency and productivity. In the old system in data processing still using manual systems, which can lead to much accumulation of documents and files can be a time of data loss or destruction of data. Circumstances of such data will impede the presentation of data and require a long time in search of information.
Use of Microsoft Access applications for finance administration / credit is helping to overcome the obstacles that occur in the preparation of reports, expedite information for AL-JIBAAL BMT or the parties who need and can avoid kerangkapan data.
