Keywords: Employees Acceptance

Abstract:

Usage of computers as aids in recruitment of employees in this new Penta Graha PT.Marga at an early stage or a trial, for it still felt the need for improvements to the results obtained more perfect, but at least this program can assist in collecting and displaying re- existing data and computer information, so that at a time of need can be found quickly.

The use of computerized recruitment is very practical and easy to use because the live view and choose menus that are already available on the program and the command has been using the Indonesian language that is understandable.
