Abstract:

Beyond Studio is a music studio that can be used for band practice for each of its customers. Where every day is always filled by the customer.

In ordering the payment system or play clock, customers often complain that they did not get a receipt of payment and hours are often not fully booked with other customers.

Through the support software, namely Microsoft Access 97 can be used to make the next customer data stored in computer data storage, and by using Visual Basic program so our customers will automatically get a receipt of payment after each game.
