Keywords: System Automatic

Abstract:

In writing this paper the authors discuss the automatic system that existed at the local clearing of XYZ Bank. This system is used to provide good service to customers than using a local automated system which is efficient clearing but did not give satisfaction in service to customers who have accounts at the bank. Both systems have advantages and disadvantages of each, but the goal of every bank is to attract the customer's money as much as possible while providing good service so that the local clearing system semiotomasi more help service.
