Keywords: data search

### **Abstract:**

Availability of data at the time it takes has to be the key success of the course of an activity. This also applies to a mining company such as the PT. Amoseas Indonesia Inc.. And to ensure the availability of accurate and timely data, in addition to physical data storage capacity is good, then the search data will also play an important role to influence the availability of data. Therefore the use of aid programs for data search is also very important existence.
