MECHANISM ALIGNING (GATEWAY) BETWEEN OPERATING SYSTEM BASED ON COMPUTER NETWORKS IN UNOCAL

Vera Morina Oktavia Carla, 10492692, Drs.Ida Ayu Wiastiti, M.KOM

Abstract:
Computer network is a system that allows for the sharing of information among users. Use of operating systems in the network settings is an absolute must. Replacement of the network operating system should really consider the possibility of impacts. Aligning is one solution in order to connect two different systems.
