### **Abstract:**

PALATIKA (Nature Lovers Informatics and Computer Jakarta) is a unit of Student Activities in Campus STMIK Jakarta STI & K, which moves in the field of Nature Lovers. During the time the listing on the SME Palatika correspondence for the manufacture of the report is still performed manually, with the way the notes on paper and on the move through Microsoft Word as the approaching end of the accountability report so many letters that are not listed.

Palatika should use a database that has a very important role in the processing of data such as correspondence data. Through this Correspondence Database handling using PHP (Personal Home Page) and MYSQL is a good solution in solving the problems faced during this Palatika secretary is that it can launch a secretary working in the preparation of reports and correspondence in the correspondence received.
