Keywords: system rental, party equipment

Abstract:

With the rapid economic growth, the effect on the various activities of life, and this causes people to want things to run fast-paced and practical.

RH. Rohman is a place of party equipment rentals, rental leasing procedure is run by coming directly to place them. During this method of party equipment rentals are not yet using computerized, manual processing is to find the constraints among other data storage is less neat and data search is not efficient because it takes a long time.

Because of the complexity in such a lease transaction party tools, mechanics needed a system that can manage data effectively and efficiently rentals. So that the data obtained by the consumer or the tenant is always accurate and errors that can harm both parties could be lessened or removed.

With the rental of data processing systems simple and efficient to make the transaction process is rapid and uncomplicated. Accurate data processing make the leaders can analyze and then take the best step.
