Keywords: computerization of data processing

### **Abstract:**

Ability of investment firms in computer hardware are often less balanced by the availability of human resources capable of utilizing the resources of both hardware and software available software optimally.

The same above experienced by PT Camila Internusa Films, where facilities owned by the company has unused maximally, in the sense applied by the use of the system was inefficient. So that if any information is required it must be re-find and merge multiple data sources manually to the required information is available or can be said briefly computers just serve as a type. Then the writer can create a new system that has more processing speed when compared with the old system and save the data storage media.
