DATA PROCESSING SYSTEM IN VALUE RAPORT BALI VILLAGE SDN 03 PAGI

Marlian Masri, 30497327, Eko Hadiyanto. SSi. MMSi

Abstract:
Number of information that is not regularly within the running system so that the processing value rapot look long and complicated. In the old system a lot of work to do it manually by teachers and elementary school homeroom Kampung Bali 03 Pagi, a constraint that is often encountered in the current system.
If the proposed system has been running, the obstacles encountered in the running system is expected to be overcome. Information provided to students and parents of students Elementary School Kampung Bali 03 Morning becomes faster and more accurate because the data stored adanaya mediated storage into a file.
In addition in this new system is expected to faculty related especially teachers and homeroom teacher had no difficulty in obtaining the information needed, including making the value of report cards, and report the value of report cards.
