Keywords: Sales Administrative System

Abstract:

PT. INDOTEX is a private company engaged in the textile industry which previously produced material to make a T-Shirt, extends product garment (apparel).

Sales system is an essential part of a company because it will determine the success of high and low sales gains. For the successful achievement of predetermined sales targets it needs a reliable supporter of sales administration.

Finished goods sales administration system that is currently running between one part is not integrated with other parts. In addition there are several problems in data processing, which does not comply with the hope and less assist management in taking decisions and the slow service. The author, trying to design a support system administration and apparel sales materials that can help solve the problems that occurred in the old system.
