Keywords: Payroll System

Abstract:

By looking at some of the constraints faced by the U. D. PLASTIC MEKAR about salary details, salary slips and making statements that in the process from working notes to be a paycheck is still using manual methods, so that the greater cost and time required to resolve the salary calculation relatively long, especially if these companies some time to develop.

To overcome the above requires a computerized system that can facilitate, speed up the process and making a good paycheck calculations and reports can also save the cost.
