Abstract:

To provide the best service to consumers, the precision and accuracy of data is needed. This is to avoid the mistakes in the handling of every transaction that took place, especially on transactions that amounted to much and lasted more than one transaction per day.

With the implementation of computerized systems on beverage Agent Andir expected to solve various bottlenecks in the implementation of the reservation system transactions manually, which is applied by this company. Implementation of a computerized system that will ease the company has been in process for efficient and effective transaction better.
