Keywords: Desktop Publishing

Abstract:

The birth of the term desktop publishing due to the increasing use of computers in the business world. This term appears in the print world, where its presence raises a question for those concerned as to whether it was desktop publishing, and for what. On the other hand the emergence of this term is a new opportunity for a variety of computers and devices that can be offered with menyandak predicate. In these circumstances, of course the information is required, let alone computers are generally still regarded as new products in the world of printing.
