### **Abstract:**

Increasing number of private radio stations today, spur competition in improving the quality of the radio station. One is the format of the show, a radio star who has the format of the show playing the songs in the form desired by the listener, to facilitate the implementation of the screening officer within the song, the writer assists them in making cassette and compact disk catalog. With the aim of presenting information to stakeholders about the layout of cassettes and compact disks.

Before you create a catalog, first cassettes and compact disks are grouped according to the Dewey classification tithing, through microsoft access software application. Currently preparing a cassette and a compact disc is grouped by type of music and a singer, as well as placed on the shelf placement of cassette tapes that have not been filled (empty) with the type of music.
