Keywords: Inventory Information System Analysis

Abstract:

A system can be said to be good, if the system can provide the required information quickly and accurately. From the analysis that the author did in the inventory system used by CV. Citra Artha Buana, there are several obstacles, among others, on the control system is out of goods and goods in, handling returns of goods, inventory and difficulties in collecting data from the relevant sections. Therefore, for the smooth progress of work and the company needs to make a better system.
