COMPUTERIZED SYSTEM ADMINISTRATIVE DATA PROCESSING AND NEW STUDENT LPBM CIKUPA TANGERANG

Idi Candra, 30498140, Irfan. Skom. MM

Abstract:

Computer technology develops very quickly, with this development had much of a company which uses a computerized system in data processing employees.

Computerized system is very helpful way of working of an institution in processing student data when compared to manual systems. For that purpose in writing this research, the author wants to give input at the institution during the course how to solve this problem is to convert the manual system to computerized system.

Given this input operation authors hope this course will more quickly and efficiently.
