Keywords: HTML, Notepad, Website

Abstract:
HTML or Hyper Text Markup Language is one programming language to create a homepage or website.
In making this HTML document authors use the Notepad editor. HTML document has three main tags, namely <HTML>, <HEAD>, and <BODY>. Among the tags this will then be an HTML document on the organization Web site will be defined, for example we can divide a page into multiple frames, insert a picture (image), hyoertext links, and an interactive form where we can communicate with visitors.
By using HTML will provide convenience for the user in making a website. Due to HTML, a document can be accessed by all types of computers regardless of operating system platforms, in other words opating HTML can be used with Windows systems, Linux, UNIX, and so forth.
