ROOM RESERVATION APPLICATION AND ADMINISTRATION AT THE HOTEL MATRA

Hariyanto, 30497232, Sahni Damerianta P. SKom, MM

Abstract:
This information system is now widely used by the public as information that helps in terms of data processing, as well as hotels Matra which data processing has not been maximized. With the existence of the information system based on ease of preparation room no. Buyer, no. Room type or price and inventory can be more rapid, precise and accurate.

By using information systems make the job easier and can save time and effort employees Hotel Marta. In studying information systems which will need a strong theoretical foundation for supporting information to be used, so that in running its data processing errors can be avoided, for supporting a covering used DFD context diagram, diagram of zero, ERD, normalization da file specification.
