Abstract:
In writing this study, the authors tried to explain about the payment of administrative applications in a car repair shop, where the garage is a car repair and maintenance places, and usually for customers who've never fix his car in the garage will be given a receipt of payment in the form of invoice payments.

The problems that the authors try to describe is that the workshop which in the service manual is still facing many difficulties in seeking customer data, so the service provided to customers is still not quick enough in the process. Another problem also arises in terms of data storage that is consuming the place, where the number of customers who came to fix the car more and more, so that data records are also increasingly numerous improvements.
