Keywords: Design House, Rental Stores Computerized

Abstract:

PT. RAY NOBLE ENDOWMENT is a new company engaged in the sale and rental of shop houses (shop). The company has a weakness in its business that is give information to consumers, recording, storage is still using the big book or manual. Because of that, in this writing, the author tries to make the computerized data processing systems primarily provide information on the process of shop houses, listing tenants and transaction data with the tool. With the development of systems and system design is done, the writer tries to create a computerized system for processing of administrative data that form the core of the discussion in this writing.
