Abstract :
This writing explains the computerized system at the company's sales "Cain Batik MDS" which during the process is still done manually, so much the possibility of error and is considered less effective and inefficient. Therefore, the authors provide a better alternative to create a computerized sales system with a simple batik using Visual Basic 6.0 programming language, which will be proposed by the authors to assist with the inputting of data processing goods through the production and sales process, which will then be automatically stored in a database and will exit the display output to be received by the customer or purchaser as the invoice or receipt and to come to the view sales reports required by employers proficiency level in these batik cloth.
